Venkatesh K
UI/UX Developer & Designer

2021(August) - 2022(October) [1.3 Years]

Company: EWIG Technologies Pvt ltd, Hyderabd, Telangana.

Role: Frontend Developer
Responsibilities: API Integration, UI Designing and Responsiveness.

1.PROJECT NAME: Test Series

Student Portal: The LA Excellence Test Series website is an online assessments that will help students to analyze their performance for the various competitive exams(IAS etc). We can call it 'Mock exams' or we can say 'Practice tests' that help the students to analyze their study and how much more or less they need to focus on subjects.

Admin Portal: This Application stores all entered data into a single database, allowing all departments to work with the same information. Additionally, all this data can be organized, analyzed and made into reports. This Application also helps the Administration to analyse the student admissions and their payments according to branch, date, locations etc.

Technologies Used: React Js Basic, Java Script, Bootstrap, Html, Css.
Duration: 2021-2022

2.PROJECT NAME: Exam Tracker

The Application is designed to help the students for academic development through conducting various online classes on the various syllabus according to their subjects which depends on their groups like, MPC, BIPC, etc. This will also help the students to prepare for the public objective examinations like, EAMCET, AIEE, NEET, etc, through conducting several mock tests.

Technologies Used: Angular Js Basics, Java Script, Bootstrap, Html, Css.
Duration: 2021-2022

3.PROJECT NAME: Plug XR

PlugXR's cloud-based platform is equipped with essential features to create seamless Augmented Reality Apps & Experiences and publish it in WebAR or a white-labelled app on Android & iOS or in the PlugXR app with absolutely NO Coding or Dependency.

Technologies Used: React Js Basics, Java Script, Bootstrap, Html, Css.
Duration: 2022
